*Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 2, 5, 6, 9, 10, 13, 14, 17, 18, 21, 22, 25, 26, 34, 39, 40, 43, 44 and 47, drawn to compounds, pharmaceutical compositions and method of use of the compound of claim 1.

Group II, claims 3, 4, 7, 8, 11, 12, 15, 16, 19, 20, 23, 24, 27, 28, 41, 42, 45, 46, 48 and 49, drawn to compounds, pharmaceutical compositions and method of use of the compound of claim 3.

Group III, claims 29 and 30, drawn to a method for improving blood flow to the optic nerve head or the retina and a composition for doing the same.

Group IV, claims 31 and 32, drawn to a method for providing neuroprotection to the optic nerve head or the retina and a composition for doing the same.

Group V, claims 33, 35 and 36, drawn to a method for treating retinal diseases and a composition for doing the same.

Group VI, claims 37 and 38, drawn to a method for lowering IOP and a composition for doing the same.

Art Unit: 1624

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claims lack unity of invention because the compounds of the instant claims do not possess single structural element that is shared by all of the alternatives. There is no common structural feature shared by all of the alternatives which is inventive. The common structural feature of the compounds of the instant claims is **not** a patentable advance over the prior art.

The claims are drawn to structurally dissimilar compounds which are classified separately, require separate literature searches and are not art recognized equivalents. They are made and used independently.

Note that compounds, corresponding compositions, a method of use and a process of making that are of the same scope are considered to form a single inventive concept under PCT Rule 13.1, 37 CFR 1.475(d). The instant claims are not so linked as to form a single inventive concept. The compounds are so diverse in scope that a prior art anticipating one compound under 35 USC 102 would not render obvious another compound of the same claim under 35 USC 103.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

Art Unit: 1624

named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is further required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruck Kifle whose telephone number is (703) 305-4484.
